GSS Harmonised Principle

About this document

This document forms part of a series of GSS Harmonised Principles, designed to provide approved harmonised questions, definitions and outputs for a variety of social and business related topics. The use of harmonised questions, definitions and outputs will provide greater consistency for survey producers and comparability when using data.

For more information, please see the Introductory Document, available on the GSS website:

<https://gss.civilservice.gov.uk/statistics/methodology-2/harmonisation/>

The Harmonised Principle on National Identity and Religion is covered in a separate document available at:

<https://gss.civilservice.gov.uk/wp-content/uploads/2016/03/National-Identity-and-Religion-June-17.pdf>

In addition to these principles more detailed guidance is available called *'Measuring equality: a guide for the collection and classification of ethnic group, national identity and religion data in the UK'* which offers further assistance for anyone involved in collecting and presenting ethnicity data in the UK.

It is important to note that when collecting data about national identities, a national identity question should be asked along with but separately to an ethnic group question.

This is Version 3.4 published in June 2017

This document has been updated to Version 3.4 to reflect the change away from 'Primary Principles' and 'Secondary Principles' to 'GSS Harmonised Principles'. There has been no change to the harmonised questions.

Previous versions:

Version 3.3 published in May 2015

This document has been updated to Version 3.3 to correct minor formatting errors and to change the term *'Harmonised Standards'* to *'Harmonised Principles'* as agreed by the National Statistics Harmonisation Group

Version 3.2, published in February 2013

This document has been updated to include notes to accompany the Outputs, detailing how Gypsy, Traveller and Irish Traveller should be recorded, due to differences across the UK. This change has been approved after consultation with the Devolved Administrations.

Version 3.1, published in August 2011

This document presents the new recommended principles for the ethnic group question in England, Wales, Scotland and Northern Ireland. These harmonised principles have been approved by the GSS Statistical Policy and Standards Committee and ratified by the Heads of Profession. They were developed through consultation with the Ethnicity, Identity, Language and Religion sub-group following a two year programme of work.

Version 3.0 published in November 2008.

This document has been updated as a result of re-formatting the document so that 'inputs' appear before 'outputs' for each Harmonised Principle. An error in the categories of Ethnic Group for the Inputs has also been amended.

Version 2.0 published in April 2008.

This document was updated to Version 2.0 to reflect the changes in the contact details for the Harmonisation Team. Information on a 'Language' definition was also added.

Version 1.0 published in October 2005.

This document is part of a series that replaced the Harmonised Concepts and Questions document. We have been working to make our guidance easier to find and clearer to use. Previously, questions on Ethnic Group were accessible through the Ethnic Group Statistics website. We have now made it easier for you to access the Ethnic Group questions by listing them in this module.

Introduction

GSS Harmonised Principle

The following guidance sets out the harmonised country specific ethnic group questions for use in social surveys in England, Wales, Scotland and Northern Ireland. They have been developed through consultation and workshops with key stakeholders that have included:

- Scottish Government (SG) / National Records of Scotland (NRS)
- Welsh Government (WG)
- Office of the First Minister & Deputy First Minister/ Northern Ireland Statistics and Research Agency
- Equality and Human Rights Commission
- Data Standards Working Group
- Other government departments
- Academic

A large proportion of government surveys are interviewer-led (e.g. Computer Assisted Telephone Interviewing, face-to-face and Computer Assisted Personal Interviewing). However, self-completion modes of administration (e.g. paper-based, Computer Assisted Self Interviewing and internet) are also widely in use in surveys. Some variation in the way the questions need to be asked exists between different modes of administration and as such they have been outlined in three formats:

- Face-to-face interviewer led surveys (e.g. show card format) including harmonised country specific, GB and UK variables. The recommended wording of the question is also provided in these sections
- Broken down by variable as they would appear in telephone surveys or other two-part interviewer led surveys including harmonised country specific, GB and UK variables.
- Tabulated to show GB/UK outputs for surveys as they would appear on self-completion, paper-based surveys. This includes the harmonised country specific questions and country specific questions when using the England and Wales question for Scotland.

Some ethnicity classifications vary between countries due to the specific legal requirements:

- For **Scotland** specific requirements came out of a review of the way Scottish surveys classified ethnicity following recommendations made by the Race Equality Advisory Forum in 2001 and community concerns about the classification used in Scotland's 2001 Census. The review was conducted by SG and NRS and identified the benefits for developing a separate national identity and new ethnicity classification for use on the Scottish Census and relevant Scottish Official Statistics. Both questions used together would allow people to self-express their 'Scottish-ness', 'British-ness' or any other national identity before expressing their ethnic origin. The new ethnicity classification was published in July 2008 and details of the classification (including research, consultation and question testing) can be found at <http://www.scotland.gov.uk/Publications/2008/07/29095058/0>. The classification was discussed by Members of the Scottish Parliament during considerations of the 2011 Census in Scotland and was subsequently amended for use in the Census. Details of the committee discussions can be seen in the Official Reports of the Economy, Energy and Tourism Committee (9th and 12th meetings). <http://archive.scottish.parliament.uk/s3/committees/eet/2010.htm>
- For **Northern Ireland** specific requirements comply with the Good Friday Agreement (where it isn't acceptable to ask respondents to choose between 'Northern Irish/British' and 'Irish identities') and legislation under the Race Relations (NI) Order 1997 which outlaws discrimination on grounds of colour, race, nationality or ethnic or national origin. The Irish Traveller community is specifically identified in the Order as a racial group against which racial discrimination is unlawful.

Ethnic Group Question

Inputs

It is recommended that the ethnic group question will be asked in a way that allows the respondent to see all possible response options before making their decision. Therefore, in face-to-face interviewer-led surveys, a single show card should be used which presents all response options. Similarly, a self-completion survey (e.g. paper-based) should use a single question.

The show card presentation and paper-based surveys should include the instruction 'please describe' in brackets and non-bold font following the 'any other' response options.

When collecting GB or UK data, the format of the question will vary slightly depending on whether data is being collected in England, Wales, Scotland or Northern Ireland. Each of the constituent countries has different requirements which have led to the use of different terminology and different questions (as discussed previously). Therefore, if producing outputs for surveys with GB or UK coverage and using the Scotland harmonised country specific questions, response categories can only be aggregated and presented at the main level category (due to these differences).

It is recommended that the harmonised country specific questions should be used. It is recognised that in rare cases not all GB or UK wide surveys will have the resources required to ask different questions in different countries. In these rare situations the 'England and Wales' question can be used in Scotland. However, as stated in Principle 4 of the Code of Practice for Official Statistics, an explanation should be provided as to why this decision was made.

Harmonised country specific ethnic group question: England

Below is the recommended ethnic group question for use in England. This question is recommended when a show card is used in a face to face interview or self completion survey (both paper and electronic).

Ethnic Group Question

Inputs

Harmonised country specific ethnic group question: Scotland

Below (Box 2.3) is the recommended ethnic group question for use in Scotland. This question is recommended when a show card is used in a face to face interview or self completion survey (both paper and electronic). This question has been developed to enable direct comparison with the Scottish Census and other sources in Scotland.

It is important to note when producing outputs for surveys with GB or UK coverage, if using Box 2.3, some of the response categories can only be harmonised at the main level category. Footnotes should also be included to explain the differences in the data collection process (as explained in the Principles outputs).

Ethnic Group Question

Inputs

When it is not feasible to ask the recommended country specific Scotland ethnic group question, the question in Box 2.4 (the recommended question for England and Wales) should be used (putting the Scottish option first in the response categories).

Ethnic Group Question

Inputs

Harmonised country specific ethnic group questions recommended for telephone surveys

Where use of a show card is not possible (e.g. telephone surveys), the question should be asked in stages due to the length of the question. The recommended stages are presented in Box 2.6 (Part 1 and Part 2).

The interviewer should use the word 'or' after each response option in parts 1 and 2 of the two-stage question. A pause in speech should be used to indicate a forward slash (/). For Scotland 'or' is used instead of a forward slash.

Issues to note when presenting data based on using the country specific harmonised country specific ethnic group question for England and Wales

*There are differences in data collection across GB (Gypsy, Traveller or Irish Traveller is collected in England and Wales and 'Gypsy/Traveller' is collected in Scotland). Where numbers are too small or disclosive the category should be merged with 'Other White. It is recommended that 'Roma' responses are included under 'Other ethnic group' and a footnote should be presented to clarify this.

Issues to note when presenting data based on using the harmonised country specific ethnic group question for Northern Ireland

*For Northern Ireland 'Irish Traveller' is collected under its own ethnic group and should be presented as 'Irish Traveller'. Where 'Irish Traveller' numbers are small or disclosive it is recommended to output to 'Any other ethnic group'. Note that 'Roma' responses should be recorded under 'Other ethnic group'. Northern Ireland's framework for monitoring minority ethnic and migrant people published by the Office of the First Minister and deputy First Minister in July 2011 recommends that Roma is categorised under 'Other' ethnic group. This is because there is a distinct category for Irish Travellers, who by law (Race Relations Order) are categorised as an ethnic group in their own right. Roma is not a subset of the Irish Traveller group and the need is to have accurate data on both Roma and on Irish Travellers.

Data presentation for GB output

If the harmonised country specific ethnic group questions for England, Wales and Scotland are used to produce a GB output then the presentation of data should follow order of responses in Box 2.10. It is important to note that due to some of the differences in the format and wording of Scotland's harmonised country specific ethnic group question some responses are not directly comparable. Response categories should be aggregated and presented at the main level category with footnotes to explain the differences in the data collection process.

Issues to note when presenting GB data based on using the harmonised country specific ethnic group questions for England, Wales and Scotland

* If data too small or potentially disclusive it should be combined with 'Other White'. There are differences in data collection across GB - Gypsy, Traveller or Irish Traveller is collected in England and Wales and 'Gypsy/Traveller' is collected in Scotland.

It is also recommended that 'Roma' responses are included under 'Other ethnic group' and a footnote should be presented to clarify this, however for Scotland it is likely that some 'Roma' might be included under Gypsy/Traveller.

**The Polish category from the country specific question for Scotland should be combined with the 'Other White' category. Also be aware of the possibility that 'White Africans' could have been recorded under 'African' and 'Other White' in Scotland.

*** Mixed/multiple ethnic groups isn't broken down for the country specific question for Scotland and a footnote should be included to explain differences in data collection.

**** Differences in the terminology and data collection of the country specific Scotland question make these categories difficult to compare. The 'African' category in the Scottish question is presented in a separate section to the Caribbean or Black category, however under the harmonised output these two categories are output as part of 'Black/African/Caribbean/Black British'. The African categories used in Scotland could potentially capture 'White/Asian/Other African in addition to Black identities.

If the harmonised country specific ethnic group questions are followed for both England and Wales and the same question is used for Scotland then the presentation format for ethnic group data should follow that of Box 2.11.

Data presentation for full UK output

If the harmonised country specific ethnic group questions for England, Wales, Scotland and Northern Ireland are used to produce a UK output then the presentation of data should follow Box 2.12. Issues to note when presenting UK data based on using the harmonised country specific ethnic group questions for England, Wales, Northern Ireland and Scotland

* This category could include Polish responses from the country specific question for Scotland which would have been outputted to 'Other White' and then included under 'White' for UK (also see ** for issue with Gypsy, Traveller and Irish Traveller). Also be aware of the possibility that 'White Africans' could have been recorded under 'Other White' and then included under 'White' for UK.

** For Northern Ireland, 'Irish Traveller' is collected under its own ethnic group. Where numbers for 'Irish Traveller' are small or disclosive in Northern Ireland it is recommended to output to 'Other ethnic group'. Where numbers are small or disclosive for England, Wales and Scotland it is recommended to output to 'Other White'.

There are differences in data collection across the UK for 'Gypsy, Traveller or Irish Traveller', which make it difficult to produce a UK estimate. Gypsy, Traveller or Irish Traveller is collected in England and Wales and 'Gypsy/Traveller' is collected in Scotland and they are both output under 'White'. However, if there is a need to show a UK output for, 'Gypsy, Traveller or Irish Traveller' (and the numbers are not small or disclosive,) the responses from the GB questions can be combined with the responses from the 'Irish Traveller' category from Northern Ireland. It is recommended that 'Roma' responses are included under 'Other ethnic group' and a footnote should be presented to clarify this. However for Scotland it is likely that some 'Roma' might be included under Gypsy/Traveller. Northern Ireland's framework for monitoring minority ethnic and migrant people' published by the Office of the First Minister and deputy First Minister in July 2011 recommends that Roma is categorised under 'Other' ethnic group. This is because there is a distinct category for Irish Travellers, who by law (Race Relations Order) are categorised as an ethnic group in their own right. Roma is not a subset of the Irish Traveller group and the need is to have accurate data on both Roma and on Irish Travellers).

***This classification isn't broken down for the country specific question for Scotland and a footnote should be included to explain differences in data collection.

****Differences in the terminology and data collection of the country specific Scotland question make these categories difficult to compare. The 'African' category in the Scottish question is presented in a separate section to the 'Caribbean' or 'Black' category, however, under the harmonised output these two categories are output as part of 'Black/African/Caribbean/Black British'. The African categories used in Scotland could potentially capture 'White/Asian/Other African' in addition to 'Black' identities.

Issues to note when presenting UK data based on using the harmonised country specific ethnic group questions for England, Wales and Northern Ireland and the England and Wales question for Scotland

* There are differences in data collection across the UK for 'Gypsy, Traveller or Irish Traveller' which make it difficult to produce a UK estimate see **.

** For Northern Ireland, 'Irish Traveller' is collected under its own ethnic group and should be presented as 'Irish Traveller'. Where numbers for 'Irish Traveller' are small or disclosive in Northern Ireland it is recommended to output to 'Other ethnic group' (***). Where numbers are small or disclosive for England, Wales and Scotland it is recommended to output to 'Other White'.

There are differences in data collection across the UK for 'Gypsy, Traveller or Irish Traveller', which make it difficult to produce a UK estimate. Gypsy, Traveller or Irish Traveller is collected in England and Wales and 'Gypsy/Traveller' is collected in Scotland and they are both output under 'White'. However, if there is a need to show a UK output for, 'Gypsy, Traveller or Irish Traveller' (and the numbers are not small or disclosive,) the responses from the GB questions can be combined with the responses from the 'Irish Traveller' category from Northern Ireland. It is recommended that 'Roma' responses are included under 'Other ethnic group' and a footnote should be presented to clarify this, however for Scotland it is likely that some 'Roma' might be included under Gypsy/Traveller. Northern Ireland's framework for monitoring minority ethnic and migrant people' published by the Office of the First Minister and deputy First Minister in July 2011 recommends that Roma is categorised under 'Other' ethnic group. This is because there is a distinct category for Irish Travellers, who by law (Race Relations Order) are categorised as an ethnic group in their own right. Roma is not a subset of the Irish Traveller group and the need is to have accurate data on both Roma and on Irish Travellers).
