The decentralised nature of health and care system in England means that a number of organisations are involved in the collection of data that underpin official statistics and the publication of a range of outputs. The English Health Statistics Steering Group have developed a health and social care statistics landscape which provides links to all key official health and social care statistics in a central place. The landscape is intended to help all users find relevant statistics and associated information on specific health topics and cross-cutting themes.

The landscape is new and experimental, and will continue to be developed. We welcome your views and feedback on the content, structure, presentation and usefulness by contacting us at gss.health@ons.gov.uk

**HEALTH DATA LANDSCAPE**

**Cancer**
- Breast Screening Programme
- Cervical Screening Programme
- Health Survey for England
- Hospital Episode Statistics
- Hospital Outpatient Activity - Diagnostic Imaging Dataset, Linkage Report, QOF Recorded Prevalence - Cancer
