

Principles

Increasingly to be delivered to stats producer organisations and others through Data Services Platform.

Opportunity for ONS to link health and care data to non-health and care data for the benefit of society under Digital Economy Act.

DATA

Data linkage or, where data not record-level, clustering like datasets together on particular topic or geography.

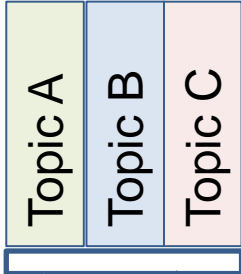

Ensure right data collected

Made available to customers, including research with appropriate legal basis

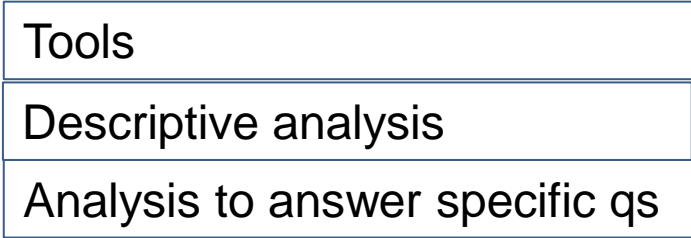

Lead stats producing org agreed on topic-by-topic basis; orgs work together on given topic using all relevant data.

Landscape "portal" links users to all relevant information on topic

Topic view

Product-type view

Composition of product types vary between orgs, but none of these exclusively to single org.

USE OF DATA
