## **SQL queries used to filter the H-CLIC data extracts for the Data Quality reports.**

This is a working document which lists all filters that are applied to the DELTA data extracts to produce the 5 quarterly QA reports:

1. Initial assessments
2. Prevention
3. Relief
4. Main duty
5. Temporary accommodation

Its aim is to assist local authority software developers and analysts with reproducing data quality reports from their end and check their data submitted to the MHCLG.

As the Statutory Homelessness publication develops, more items can be added to the reports and this document may be amended accordingly.

The variables specified in the below queries (ASSESS1, status, ASSESS\_DATE etc.) are defined in this document: [https://gss.civilservice.gov.uk/wp-content/uploads/2019/02/HCLIC-Data-Specification\\_v1.4.3.pdf](https://gss.civilservice.gov.uk/wp-content/uploads/2019/02/HCLIC-Data-Specification_v1.4.3.pdf)

h-clic, h-clic\_TA\_ENTRIES and h-clic\_PEOPLE refer to the names of the XML sections of the form, i.e. h-clic is the main, prevent, relief, decision, final duties fields, TA\_ENTRIES are the temporary accommodation placement details and h-clic\_PEOPLE are the people fields.

P1E figures (legacy data) reported on the Interform are not covered by this document.

The below queries include dates (highlighted in **blue**) – these need to be amended each quarter. Current dates refer to the July – September 2018 quarter.
