

# HEALTH AND CARE STATISTICS LANDSCAPE FOR ENGLAND

The decentralised nature of health and care system in England means that a number of organisations are involved in the collection of data that underpin official statistics and the publication of a range of outputs.

The English Health Statistics Steering Group have developed this health and social care statistics landscape which provides links to all key official health and social care statistics in a central place. This landscape is intended to help all users find relevant statistics and associated information on specific health topics and cross-cutting themes. Additionally, we have released a new and experimental [interactive tool](#). We would still welcome any [feedback](#) on the content, structure, presentation and usefulness of this tool. Similarly, information for Wales can be found using the Welsh Government's [mapping tool](#).
